

Help
your kids be
CyberSafe
A QUICK REFERENCE GUIDE

We are committed to partnering with
you to keep our communities safe!

Helping kids be **safe, confident explorers** of the online world.

TALK

Have conversations early and often about the importance of online safety. Tell your children to:

- Be careful: people aren't always who they say they are
- Keep their password a secret from everyone, even their best friend
- Don't ever use any personal information in an online game
- Ask an adult before they download anything

PROTECT

Use parental controls on their devices to limit access to certain applications and websites. Consider installing a third-party app to help monitor your child's online activity and block age-inappropriate websites.

CHECK

Have your children use their devices where you can see them and check in on their activity to ensure they are being safe.
